<b>28</b> <b>Waffles or Cereal</b>  Street Tacos OR Cheese Quesadilla  Rice and Beans	<p><b>February is National Cherry Month!</b>                      It's likely George Washington never cut down a cherry tree. Despite what we learned in poems as kids, there is no factual evidence that our first president chopped down any of these fruit-bearing trees. The myth was created by Parson Mason Weems, who wrote the story in a biography of President Washington to illustrate his integrity and honesty.  <b>The average cherry tree has 7,000 cherries.</b>                      That's right. A single tree can yield enough cherries to make 28 pies. (Or at least a few of our favorite cherry desserts!)</p> <p><b>A cherry tree can be harvested in seven seconds.</b>                      Thanks to the introduction of mechanical tree shakers, the process of hand-picking cherries now takes a mere seven seconds per tree. Because the machine is so intense, it shortens a tree's life by seven years, though.</p>
